

TECHNICAL DATA SHEET

PRODUCT: CORNER PVC REINFORCED WITH FIBERGLASS MESH

DESCRIPTION: It is an important accessory in con-

struction, used to reinforce and protect the corners of walls. In this way, a strong, regular, and straight structure

is formed.

CHARACTERISTICS: It is resistant to moisture, rust, and corrosion,

thanks to the PVC (Polyvinyl Chloride) raw material. The side part with holes ensures a

very strong adhesion of the corner to cement-based products.

The presence of the fiberglass mesh helps

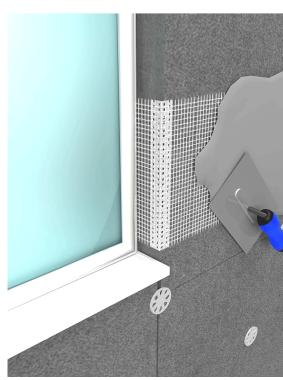

with adhesion and prevents cracking.

APPLICATION: Suitable for applications in indoor spaces

and facades. Recommended due to its composition characteristics in environments with humidity, as the metal mesh rusts over

The presence of the fiberglass mesh helps

with adhesion and prevents cracking.

TECHNICAL DATA STANDARDS

Thickness of the PVC profile ~1,1mm

Width of the PVC profile 21mm x 21mm

Length of the PVC profile 250 cm

Width of the fiberglass textile mesh 8+12cm, 10+10cm, 10+15cm (±0,5cm)

Length of the fiberglass textile mesh 257 cm

Weight of the fiberglass textile mesh 125 g/m²

Adhesion strength of the fiberglass textile mesh 30-50N

Responsibilities of the Projectors /End User:

Product Suitability:

The projectors /end user must ensure that the product is suitable for use in specific conditions and structures.

Technical Characteristics:

The product must meet the specified technical characteristics.

Usage Variations:

Possible variations in the use of the product cannot be predicted by the manufacturer.

Reviews and Updates:

The technical sheet may be updated based on new knowledge.

Regulations and Compliance:

The product does not require special labeling according to Regulation (EC) No. 1907/2006 (REACH).

Health and Safety:

The product must be stored in dry conditions, protected from heat and rain.

Storage and Handling:

Proper storage is important for the quality and warranty possibilities.

Storage and Handling:

Proper storage is important for the quality and warranty possibilities.

Warranty and Guarantees:

Guarantees are linked to legislation and the distributor's conditions.

Standards and Specifications:

The technical sheet complies with the relevant standards.

Issued: 20.03.2025

Validity of the Technical Sheet: Valid for products sold by Dekoll after January 20, 2025, and until the revision of the ETAG 004 guidelines.

Address: Durrës-Tirana Highway, Km 5, Durrës, Albania
