## WATER-BASED PRODUCTS

Discover the beauty of water-based paint products, where innovation meets the ecological effect. They come in a series of amazing colors and finishes, allowing you to bring out your creativity and contributing to a sustainable future.

GIVE COLOR TO IMAGINATION

# AQUAPINTO DECOR

Decorative and anti-mold product with color, suitable for application on every interior and exterior wood surface. Water-based and with deep penetration into the wood. Ideal for preventing the growth of bacteria and fungi in the wood layer. Suitable for application on wood surfaces, especially for surfaces in interior environments that lack suitable ventilation. It has extremely high resistance against difficult atmospheric conditions, from sunlight, from moisture and frost. It gives a satin appearance which increases the natural beauty of the wood.

# AQUAPINTO PRIMER

It is a white ecological water-based primer, ideal for interior and exterior wood surfaces. It shows strong adhesion on surfaces painted with solvent-based enamel colors. Due to its special formula, it protects the user and does not pollute the environment. It does not contain dangerous substances, such as heavy metals, free formaldehyde, aromatic hydrocarbons. It has good workability and high coverage.

# AQUAPINTO VARNISH

Protective varnish for interior and exterior use. It gives the wood a beautiful glossy appearance which will not yellow over time. This layer gains resistance to rain after the first hour of application. It offers long-term protection, odorless and environmentally friendly. Transparent final coating which dries in 30 minutes.

# AQUAPINTO ZMALTO

It is an ecological water-based paint of premium quality, for wood surfaces. It is ideal for all interior and exterior inhabited areas. Due to its special formula, it protects the user and does not pollute the environment. It does not contain dangerous substances, such as heavy metals, free formaldehyde, aromatic hydrocarbons. It has great whiteness and does not yellow over time. It has excellent working and leveling properties and has great elasticity. It has very good coverage, high spreading and leaves a smooth final surface. Available in glossy and satin.

MIX WELL BEFORE USE  
PROTECT FROM FROST
