We present the newest products from PintoColor to make your work even easier.

PINTOCRYL QUARTZ

Acrylic paint containing crystalline silica produced from high-purity quartz for use in exterior environments. Also, due to its rich content with acrylic resin, it is suitable for unfavorable climatic conditions. It has special whiteness and great covering ability, good leveling, non-absorption of dirt, hydrophobic properties, good evapotranspiration.

Experience the peak of paint perfection with our trio: Pintocryl Quartz radiates timeless elegance, Pintoplast Elite embodies pure luxury, while Termax Paint ensures sustainable thermal insulation. Paint your spaces with this exclusive collection created for those who seek perfection in every brush.

TERMAX PAINT

Termax Paint is a paint of superior quality with thermal-insulating properties. It shows characteristics such as: excellent workability, long life over time, protection against moisture by keeping the temperature constant. It protects the surface of the dry paint film from mold and green stains. It is used on all interior surfaces, new or old. It can also be used in any type of exterior environment. Its special composition contributes to energy saving, during winter and summer.

PINTOPLAST ELITE

Quality paint for use in interior environments. Ease in spreading, leveling, cleaning ability, high resistance to friction, resistance to yellowing, durability. Ammonia-free product, making it ecological and friendly with every resident of the house. It is suitable for surfaces with concrete, chipboard panels, asbestos-cement materials.
